

RADIATION ONCOLOGY ACCELERATED RESEARCH

July 3, 2019

Dear Partner:

Thank you for your consideration of a corporate sponsorship for the upcoming ROAR James Bond Gala, "Licence to Cure" on January 25, 2020 honoring Bright Star co-owner and restaurant legend Jimmy Koikos. As a corporate partner, you will be our ambassador of the progress being made at the UAB Hazelrig-Salter Radiation Oncology Center and the UAB Department of Radiation Oncology as we continue our innovative research that will bring us closer to the promise of a cure.

As a corporate sponsor, proceeds from your donation will be matched by the UAB Department of Radiation Oncology in honor or memory of your corporation or a designated loved one. Your gift will be a long-term investment in the UAB Comprehensive Cancer Center's cutting-edge research and will reflect the importance of our work to the people we serve.

The department would be delighted to provide your corporation a 1-2 hour wellness symposium to include topics of your choice, e.g. cancer screening guidelines, new areas of cancer research, or the impact of detecting cancer early. Also, based on your groups interests, we will provide a cancer research update for your company newsletter, and a private or corporate- wide tour of our research labs with our physician researchers.

I am extremely grateful to YOU and to ROAR for your volunteer efforts to support our program with the aim of translating laboratory findings into new clinical treatments for patients. We strive to make important steps that will lead to more cures and your support is a tremendous help in this regard.

With appreciation,

James A. Bonner, M.D. Marie M. Salter Professor and Chairman  
Past President, University of Alabama Health Services Foundation
